## BQT's miPASS security technology to secure the World Trade Centre in Melbourne

BQT Solutions Limited is pleased to announce that BQT's miPASS smart card security technology has been selected to secure the Melbourne World Trade Centre.

The miPASS security products were the ideal choice for this installation as the technology can be retrofitted to work with the buildings existing access control system, and for paving the path for the addition of future applications. The miPASS smart cards themselves will be utilised for personnel access throughout the site as well as photo identification purposes.

The miPASS access control readers will be installed by one of BQT's partners Thales Australia, who specialise in various areas such as Defence forces, Airlines and airports.

John Genner
