BQT's supplies security products to Nigerian State House of Assembly

John Genner, Managing Director of BQT Solutions Limited is pleased to announce that BQT has been selected to supply its **SmaX** High End Access Control Security technology to the Nigerian State House of Assembly in Port Harcourt, Nigeria.

Nigeria is the world's sixth largest oil producer with Africa's most populous country of approximately 120 million people and has had one of the world's largest rollouts of Biometric technology. For the past 9 months BQT has been working closely with one of Nigeria's highly regarded companies to develop and supply the BQT technology. The **SmaX** system is designed for all small to medium size applications and is one of the lowest cost Access systems in the world. The system is high powered, simple to install and use and very cost effective.

BQT is not involved in installing access control systems, but offers these products and many others to all its distributors globally. Many of BQT's clients are major international security companies with large sales forces and these companies supply their systems to many large corporations. With the **SmaX** system, our large security clients can also supply to the small-medium end of the market.

A BQT team will oversee training of the BQT technology in Nigeria. Other meetings and presentations to the Nigerian Federal, State and Local Governments and agencies as well as their Defence Force – Army, Navy, and Air Force have been arranged. The BQT team will also be presenting to major Security & Governments agencies in South Africa on the visit.

The new **SmaX** technology has only recently been available, and globally BQT has potential sales in progress exceeding \$10,000,000. The BQT overseas sales personnel are currently in Sydney for training on all new products releases, including **SmaX**.
