## BQT Awarded QANTAS Contract to Supply miPASS Card Reader Technology to QANTAS Owned/Operated Properties & Terminals.

BQT's miPASS card reader technology provides flexibility and upgrade paths to systems of the future, including compatibility with airports who are upgrading to the Mifare technology without compromising any information related specifically to Qantas.

BQT believes its successful tender bid was due to the flexibility and quality of the miPASS technology, along with its experience of over 10 years in Mifare Smart card security/access control applications. miPASS is an Australian made and designed product which is another benefiting factor when it comes to support.

As an Australian listed company, we are delighted to be working with such a prominent successful Australian organisation such as Qantas Airways Limited.

John Genner  
Managing Director
