

Off Line Access Management Made Easy

Are you looking for a solution to provide access control where there is no data cable connection or panel?

Using miPASS Strata software and hardware allows user access rights to be managed remotely from your office, then downloaded to miPASS Strata Smart Readers via a transfer card. miPASS Strata is the perfect solution for your client's access control needs where secure doors or gates are required and it is not feasible to run communication cables to an access control panel.

- No Access Control Panel Required.
- Perfect for Building Managers and Security Providers.
- Unlimited Readers.
- Multi Site Configuration.
- Transfer user information via Transfer card.
- Stand Alone System.
- Up to 500 Users.
- Modify Users via Software.
- CSV import to Software.
- Update readers in 5 Seconds.
- Audit trail not Supported.
