

miPass Access

Product Overview

BQT's biometric access control system, miPASS Access software package, is based on IP connectivity and biometric security for full flexibility. The BioXK device work as a reader for multiple types of credentials. It has features that extend the system beyond that of conventional systems with 1 and 2 factor authentication and can establish security protocols between users and readers.

Why BQT Solutions

BQT Solutions is a specialist in the development, manufacture and supply of high quality, high security card and biometric readers, electromechanical locks and related electronic security products. Providing high security solutions to verticals such as Airports, Hospitals, Prisons and Government for over 35 years.

Innovating today for a more secure tomorrow

Product Benefits

- A software-driven system that's installed on-site, offering the convenience of local web-based management.
- Easily connect with BQT Solutions Biometric readers through reliable IP Connectivity.
- Establish nuanced security protocols between individuals and readers. From basic to intricate rules, tailor your site's security with ease.
- Link user credentials for a variety of access methods, including the added security of 2-factor authentication.
- Effortlessly manage shift work and obtain comprehensive time and attendance reports.
- Perfect for compact sites with a singular entrance or expansive locales with hundreds of access points and thousands of users.
- Highly secure biometric system safeguarded with encrypted templates.
- Integrate with the Biometric Enrolment Station for on-site desktop enrolment, offering an alternative to wall-mounted readers for new user registrations
