

YD30D CASE STUDY

# Chelsea Sugar Factory

## BACKGROUND

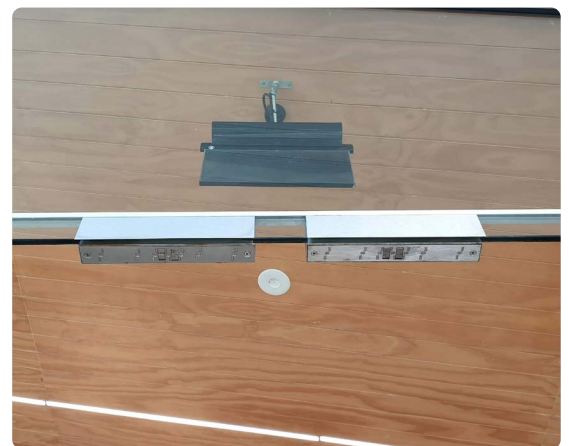

The iconic Chelsea Sugar Factory needed a secure and stylish locking solution for multiple double-acting glass doors throughout its facility. With these doors used in high-traffic areas, the factory required a solution that could provide reliable security while blending seamlessly with the sleek glass aesthetics.

## CHALLENGE

The facilities double-acting glass doors demanded a secure locking mechanism that would not detract from the clean look. Given the high visibility and frequent use of these doors, the lock needed to perform consistently without being obtrusive, ensuring a balance between security and aesthetic appeal.

## SOLUTION

The YD30D lock was chosen to meet the unique needs of Chelsea Sugar Factory's double-acting glass doors. With an unobtrusive design, the YD30D provided an effective locking solution that complemented the aesthetic of glass installations without compromising on security. Engineered specifically for double-acting doors, the YD30D ensured smooth operation and reliable re-alignment, making it the ideal choice for maintaining the factory's modern look while supporting the demands of high-traffic areas.

The YD30D offers the cleanest solution for securing glass doors, not compromising on the desired aesthetic.
